HEIGHT ADJUSTABLE ARM

Monitor adaption
preparation to accept Philips Table Top Mount

Height adjustment
slow-flowing spring, parallel linkage for a constant viewing angle

Colours to choose
decorative parts: RAL 5013 blue / RAL 7024 dark grey
aluminum parts: RAL 9016 pure white / RAL 9002 grey white

Max. load capacity support arm
22 kg/48.5 lbs

Max. load monitor adaptation
22 kg/48.5 lbs

Product weight
3.5 kg/7.7 lbs

Balancing range
800 N (3 - 8 kg/6.6 - 17.6 lbs); 950 N (5 - 11 kg/11 - 24.3 lbs); 1300 N (9 - 14 kg/19.8 - 30.9 lbs);
1750 N (13 - 17 kg/28.7 - 37.5 lbs); 2200 N (16 - 22 kg/35.3 - 48.5 lbs)

Part number
A-431PH-Y.CD_X

Fixings

If your anaesthesia machine does not have a side channel already mounted to the machine, please order the following in addition to 4U:

- ![Adapter for Dräger](image4.png) Adapter for Dräger Dräger Primus/ Julian/ Cato/ Fabius GS/ Zeus side channel adapter L 127 mm/ 5” side channel adapter L 320 mm/ 12.6” | DR-J01 DR-J02 |
- ![Adapter for GE](image5.png) Adapter for GE GE Avance/ Aespire/ Aestiva side channel adapter L 200 mm/ 7.9” | DX-AES-01 |
HOW TO CREATE PART NUMBERS

Part numbers can be easily created by following the steps below:
Please replace the letters in green with the part no. code as per your requirements.

1. Components’ grounding:
   A = grounded

2. Choose the arm version required:
   224PH/ 230PH = pivot arm, Philips interface
   H33030PH = extended pivot arm, Philips interface
   431PH = height adjustable arm, Philips interface
   73130PH = extended height adjustable arm, Philips interface
   531PH = high position height adjustable arm, Philips interface
   83130PH = extended high position height adjustable arm, Philips interface
   224FMS/ 230FMS = pivot arm, FMS interface
   H33030FMS = extended pivot arm, FMS interface
   224MP2/ 230MP2 = pivot arm, MP2/ X2 interface
   224MP2PS/ 230MP2PS = pivot arm, MP2/ X2 interface with power supply enclosure
   33030MP2 = extended pivot arm, MP2/ X2 interface
   33030MP2PS = extended pivot arm, MP2/ X2 interface with power supply enclosure

3. Specify where you want to mount the arm and select the fixing (Y):
   1V = pole ø 23 - 40 mm/ 0.9 - 1.6”
   1 = pole ø 25 mm/ 1.0”
   1F = pole ø 35 mm/ 1.4”
   1C = pole ø 38 mm/ 1.5”
   2F = horizontal rails 10 x 25, 10 x 30 mm
   3 = vertical rail
   3DR = dual vertical rails, distance 150 mm/ 5.9”
   3TX = dual vertical rails, distance 225 mm/ 8.9”
   4V = vertical wall channel
   4U = vertical wall channel for arms with high mounting position
   = anaestesia machine with existing GCX channel
HOW TO CREATE PART NUMBERS

8 = lateral adapter to Trumpf klinoPORT ceiling pendant
82 = adapter to Trumpf klinoPORT frontal
9 = Heinen & Löwenstein anaesthesia machine
10 = Maquet FLOW i anaesthesia machine

4. Choose the colour requested for decorative parts (C):
   gr = RAL 7024 (dark grey)
   bl = RAL 5013 (blue)

5. Choose the colour requested for the aluminium die-cast parts (D):
   1 = RAL 9016 (pure white)
   2 = RAL 9002 (grey white)

6. Specify the spring depending on the weight of your monitor/ device - only with height adjustable arms (X):
   80 = 3 - 8 kg/ 6.6 - 17.6 lbs
   95 = 5 - 11 kg/ 11 - 24.3 lbs
   130 = 9 - 14 kg/ 19.8 - 30.9 lbs
   175 = 13 - 17 kg/ 28.7 - 37.5 lbs
   220 = 16 - 22 kg/ 35.3 - 48.5 lbs

GENERAL NOTES

Monitor Adaptations
All mounting systems for Philips IntelliVue series are prepared to accept the Philips Table Top Mount.
Mounting solutions for MP 80/90 are shown in the catalogue “VESA 75/100 adaptation”.
Mounting solutions for the Sure Signs/Vital Signs are shown in the catalogue “5” plunge plate adaptation”.

Please note!
The Philips Table Top Mount must be ordered separately by Philips.

Components’ grounding
All arms with integrated cable management are equipped with components grounding. No grounding is required for arms with external or semi-integrated cable management with cables not being lead through joints.

Load capacity
All height adjustable arms have a load capacity of 22 kg/48.5 lbs. Rear mounted monitor adaptations and horizontally mounted 5” plunge plates accept a maximum monitor weight of 18 kg/39.7 lbs. Additional 4 kg/8.8 lbs may be mounted on a down-post underneath the front swivel part. Depending on material and tensile factor all weight indications have a 4-fold and/or 6-fold safety factor according to EN 60601-1, 3rd Edition regulations.

Custom-designed solutions and MRI applications
Please contact us for custom-designed solutions.

Product marking
All CIM products are CE marked. As medical product risk class 1 they are conform with the regulations MDD 93/42 ECC and EN 60601-1, 3rd Edition. TUEV reports for numerous products especially for anaesthesia applications guarantee electrical and mechanical safety of our products.
PRODUCT HIGHLIGHTS

Non-height adjustable arm

Pivot and extended pivot arms offer full cable integration and easy cleaning for infection control in all critical care areas in the clinical environment. Our 5-years warranty guarantees reliable, trouble-free and maintenance-free operation. The swivel function at the fixing point as well as the tilt/swivel function of the monitor adaptation offers optimum positioning of your device. The extended pivot arm is a two-part arm with central pivot point between the two arm sections. All bottom-mounted monitors have the safety feature of a 20° tilt stop.

Height adjustable arm

The height adjustable arm offers full cable integration, one-wipe clean surfaces and our 5-year warranty on the entirety of the product. Vertically and horizontally adjustable the arm offers optimal positioning of your device. A constant viewing angle when vertically adjusted is guaranteed by a parallel linkage. Weight-optimized springs counter-balance the monitor without making any adjustments. All bottom-mounted monitors have the safety feature of a 20° tilt stop. Individual rotational stops may be integrated in any joint.

SAFETY

To provide the perfect combination of arm and monitor, the CIM articulated height adjustable arm has a simply quarter-turn lock to hold the arm safely in position when removing the monitor. Furthermore the arm is equipped with the unique safety feature of a slow-release gas spring. Should anybody try to remove the monitor before locking the arm in position, our arm will only rise at a slow and even tempo.
